Duratex Heavy Knit Display Fabric

Product Description
Duratex Heavy Knit Display Fabric is a 100% polyester, heavy weight fabric designed for dye sublimation transfer.

Features/Benefits
- Premium quality heavy fabric
- Moderate opacity
- Warp knitted
- Excellent color reproduction
- Wrinkle resistant
- Can be cold cut

Applications
- SEG framing systems
- Tradeshow booths
- Table covers
- Backdrops

Physical Properties
Material: 100% Polyester
Weight: 300 g/m²
Fire retardant: B1, NFPA-701

Storage & Handling
Dye sublimated fabrics are printed with a process where ink becomes part of the fabric, so it’s impossible to damage the print without damaging the fabric as well. This also makes the resulting print washable. If necessary, it should be washed in warm water on a delicate cycle, and dried using a permanent press setting. It can be steamed or ironed using a low temperature setting for delicate polyesters.

Printer Compatibility
Dye sub transfer.
