Duratex 280g Power Stretch Display Fabric

Product Description
Duratex 280g Power Stretch Display Fabric is heavy weight fabric designed for dye sublimation transfer.

Features/Benefits
- Good opacity
- Excellent color reproduction
- Wrinkle resistant
- 4-way stretch
- Can stretch over aluminum frames to provide a solid look to their curved and irregular shapes

Applications
- Geometric displays
- Pop-up booths
- Silicone edge graphics
- Photographic backdrops
- Tension fabric displays fabricated into pillowcase-style graphics with a zipper, or attached with Velcro

Physical Properties
Material: 91% Polyester; 9% Spandex
Weight: 280 g/m²

Storage & Handling
Dye sublimated fabrics are printed with a process where ink becomes part of the fabric, so it’s impossible to damage the print without damaging the fabric as well. This also makes the resulting print washable. If necessary, it should be washed in warm water on a delicate cycle, and dried using a permanent press setting. It can be steamed or ironed using a low temperature setting for delicate polyesters.

Printer Compatibility
Dye sub transfer.
