Duratex 265g Premium Blackout Display Fabric

Product Description
Duratex 265g Premium Blackout Display Fabric is a black-backed opaque, heavy weight fabric designed for dye sublimation transfer.

Features/Benefits
- Black polyurethane coating provides excellent opacity for single sided transfer
- Slight stretch
- Excellent color reproduction
- Wrinkle resistant
- Can be cold cut

Applications
- SEG framing systems
- Tradeshow booths
- Backdrops
- Indoor banner pop-up displays

Physical Properties
Material: 100% Polyester; 150 GSM knitting cloth; coated with 115 GSM Black PU coating
Weight: 265 g/m²
Thickness: 16.7 mil
Fire retardant: NFPA 701

Storage & Handling
Dye sublimated fabrics are printed with a process where ink becomes part of the fabric, so it’s impossible to damage the print without damaging the fabric as well. This also makes the resulting print washable. If necessary, it should be washed in warm water on a delicate cycle, and dried using a permanent press setting. It can be steamed or ironed using a low temperature setting for delicate polyesters.

Printer Compatibility
Dye sub transfer.
