Duratex 180g Soft Knit

Product Description
Duratex 180g Soft Knit is a light weight fabric designed for dye sublimation transfer.

Features/Benefits
• Warp knitted
• Very soft drape
• Wrinkle and crease resistant
• Can be cold cut

Applications
• SEG framing systems
• Table throws
• General display

Physical Properties
Material: 100% polyester
Weight: 180 g/m²
Fire retardant: B1, NFPA 701

Storage & Handling
Dye sublimated fabrics are printed with a process where ink becomes part of the fabric, so it’s impossible to damage the print without damaging the fabric as well. This also makes the resulting print washable. If necessary, it should be washed in warm water on a delicate cycle, and dried using a permanent press setting. It can be steamed or ironed using a low temperature setting for delicate polyesters.

Printer Compatibility
Dye sub transfer.
