Film: 7 mil PVC
Liner: 90 lb.
Finish: Gloss
Gloss Level: Gloss, 80°(avg.) Ink type can effect the finish

Typical Performance Values
The following information on physical and chemical characteristics is based upon tests believed to be reliable. The values are intended only as a source of information. They are given without guarantee and do not constitute a warrant. The purchaser should independently determine, prior to use, the suitability of this material for his/her specific purpose. (Data represents averages and is not intended for use as a specification).

Durability: up to 3 month when applied to exterior windows under normal conditions. Outdoor conditions may effect the performance such as wind, rain and snow.

Minimum Application Temperature: +40°F
Service Temperature Range: -40°F to +200 F.
Appearance: Static cling is highly plasticized. Clear can develop a haze during application and should dissipate after installation.

Shelf Life: 3 month shelf life / Store at 70°F and 50% relative humidity.

Application Techniques: All surfaces must be clean, smooth and close to room temperature. Cold surfaces reduce the ability to "cling". Large decals should be applied by wetting application. The use of a roller or squeegee can be used to smooth the decal onto the substrate. Smaller decals can be applied dry.
