FOUNTAIN SOLUTION NP 231A
HIGH SPEED SHEETFED / WEB FOUNTAIN SOLUTION WITH NPA

DESCRIPTION:
Fountain Solution NP 231A is a one-step fountain solution for heatset web presses that contains a strong non-piling additive. The product has a strong buffering system and will work well in various types of dampening systems to provide fast, clean restarts. This fountain solution can also be used as a one step product for sheetfed presses and was designed to maximize the performance of printers running CTP plates.

DIRECTIONS FOR USE:
Always clean the dampening system before changing fountain solution. Add 4 to 6 ounces per gallon of water. The pH of the working solution should be between 4.0 and 4.2 and the conductivity should read approximately 435 micromhos per ounce used over the water.
READ SDS BEFORE USE.

FEATURES AND BENEFITS:
*Contains high technology wetting agent for reducing surface tension.
*Unique non-piling additive incorporated in the formulation.
*Formulated for CTP plates and continuous dampening systems.
*Designed for high speed web press applications.
*Strong, unique buffering system against calcium carbonate.
